marmox Lightweight Shower (XPS) Tray

Light & Easily Installed Shower Tray

Marmox lightweight shower trays are made from extruded polystyrene (XPS) and are pre-graded to the waste outlet, making shower construction quick and easy! They're designed for installation onto any type of structural flooring.

Marmox Shower Trays are available in a variety of sizes which are suitable for almost any type of shower and may be extended or trimmed to fit the specific requirements of your job. They're lightweight and allow for easy one-person installation.

XPS Shower Tray Highlights

- ★ Lightweight
- ★ Pre-graded to waste outlet
- ★ May be trimmed or extended
- ★ Easy installation
- ★ Available in various sizes and drainage offsets

Available Sizes:

Centre Outlet

Offset Outlet

XPS Shower Tray Extensions

Available Sizes:
600mm x 1000mm
(25mm to 35mm)

marmox Stone Shower Tray

Sturdy & Easily Installed Shower Tray

Marmox Stone Shower Trays are made of polymer (acrylic) modified concrete which, like their XPS counterparts, are pre-graded to the waste outlet.

The Solid Stone Underlay is classified as self-supporting and may be placed directly onto floor joists (with appropriate spacing and support).

Stone Tray Highlights

- ★ Self Supporting
- ★ Pre-graded to waste outlet
- ★ May be trimmed
- ★ Easy installation
- ★ Available in various sizes and drainage offsets

Available Sizes:

Centre Outlet

Offset Outlet

marmoxboard Construction Boards

Build your Bathroom & Wet Areas with Marmox Boards

Marmox Boards are made from CFC and XPS extruded polystyrene foam bonded with layers of fibreglass reinforced polymer cement. The surface of reinforced polymer cement is perfect for tile adhesion, waterproofing or plastering. Marmox Boards are difficult to bend, bow or distort compared to plasterboard.

Marmox Boards are perfect for use in all wet areas as both floor sheeting and wall sheeting as they will not absorb water and provide great thermal insulation.

The characteristic strength and light-weight properties of Marmox Boards make them the ideal choice for use in the construction of bathrooms, kitchens & balconies, without heavy lifting!

Available Sizes:

- ★ 600 x 1250 x 6
- ★ 600 x 1250 x 10
- ★ 600 x 1250 x 20

Special order only

- ★ 600 x 1250 x 30
- ★ 600 x 1250 x 40

- ★ 600 x 2500 x 20
- ★ 600 x 2500 x 30
- ★ 600 x 2500 x 40

- ★ 1200 x 2400 x 10
- ★ 1200 x 2400 x 12.5
- ★ 1200 x 2400 x 20

Marmox Board Highlights

- ★ High compressive strength (withstand 30 t/m²)
- ★ Will not break or rot
- ★ Completely water-resistant
- ★ Excellent heat insulation
- ★ Sound insulation (20 decibels)
- ★ High U-value (2.7 W/m²k for 10mm)
- ★ Extruded polystyrene closed cell structure retains R-value even in moist conditions
- ★ Easy to cut with a knife or saw.
- ★ Light weight. 10mm board is only 3kg/m²
- ★ Marmox is environmentally friendly, CFC and HCFC free

**Not recommended for vinyl*

marmoxboard Curved Boards

Save Time & Effort with Flexible Marmox Curved Boards

If you are searching for bathroom and wet room design ideas, Marmox Curved Boards can open up a range of exciting options. They can be used to clad, waterproof and insulate archways and curved walls, and also to create curved partition walls, curved bathroom panels, moulded tiled seats, round or curled cubicles etc.

Curved Boards are Marmox Boards of 20mm thickness which have slits 2mm wide and 17mm deep removed from one side of the board at 20mm intervals. This allows them to be folded in on themselves to create a radius as small as 200mm.

Available Sizes:

- ★ Longitudinal 600mm x 2500mm x 20mm
Slits along 2500mm length
- ★ Transverse 600mm x 1250mm x 30mm
Slits along 1250mm length

When secured against a frame or a curved wall, they present a low porosity cement curved surface which is ready for either waterproofing, tiling or plastering. Radii tighter than 200mm can also be created with Marmox Curved boards by folding the board in the opposite direction so that the “teeth” are opened. Please contact us on how to use this method.

Curved Board Highlights

- ★ Light weight. 10mm board is only 3kg/m²
- ★ High compressive strength
- ★ Completely water-resistant
- ★ Excellent heat insulation
- ★ Environmentally friendly
- ★ Sound insulation (20 decibels)

BEFORE

AFTER

marmoxboard Sloping Boards

Add a Slope to your Shower Area

Marmox Sloping Boards are an ideal, lightweight solution for balconies which require drainage in a single direction and for extending a Marmox Lightweight Shower Tray beyond their regular size.

The sloping board may be combined with Marmox Boards to extend the slope as much as is required. If a shower has linear drainage against a wall, this sloping board also functions as an underlay.

Available Sizes:

1200mm x 1200mm (10mm to 33mm)

Sloping Board Highlights

- ★ Lightweight
- ★ One-way sloping boards
- ★ Indefinite slope extension
- ★ Can be used for Lightweight Shower Tray extension

marmoxboard Bath Panels

Waterproof Tile Foundation for Baths

Marmox Bath Panels are easy to fit surround panels for built-in baths. One of the most simple to use products on the market, our bath panels make for quick and easy installation.

These are easy to fit surround panels that are designed to fit built-in baths. Like all Marmox Construction Board products, Marmox Bath Panels are fully water-resistant and come with a lifetime guarantee. Marmox Bath Panels are easy to cut to your exact fitting requirements, and installation is quick and simple. Once installed, they're ready to be waterproofed and/or tiled as desired.

Included in a Marmox Bath Panel kit is the following:

- ★ 1x 600mm x 1800mm x 30mm Marmox Board
- ★ 1x 600mm x 800mm x 30mm Marmox Board
- ★ 3x adjustable feet already fitted to the panels

Bath Panel Kit Highlights

- ★ Simple to install
- ★ Easily cut to size
- ★ Adjustable feet
- ★ Ready to tile
- ★ Fully water-resistant
- ★ Lightweight

marmoxboard Pipe Boxing

An Elegant Pipe Covering Solution

Specially designed to enable easy, fast and clean boxing-in of exposed pipe work. Marmox Pipe Boxings are completely water-resistant, so they are suitable for showers and wet rooms, as well as bath panels and can also be used for shelving solutions.

Pipe Boxing Highlights

- ★ Simple to install
- ★ Easily cut to size
- ★ Ready to tile
- ★ Fully water-resistant
- ★ Lightweight

marmoxboard Concealed Toilet Board

Easy to Install Cladding

We have designed this Toilet Board support frame cladding which is practical, easy to install and economical.

Designed with a 155cm x 120cm plate, this product is water-resistant and ready to tile.

Highlights

- ★ Economical
- ★ Easy to install
- ★ Ready to tile
- ★ Compatible with all frames
- ★ Can be cut to any height

Available Sizes:

- ★ 1200mm x 1550mm x 20mm

marmoxboard Concealed Frame Toilet Box

4-Panel Kit Adjusts to All Situations

Installing a toilet box has never been easier, faster or simpler than with our unique Marmox Toilet Box designed for any support frame.

The Marmox Toilet Box is a unique solution made from our revolutionary fully water-resistant, lightweight XPS "Marmox Construction Boards".

Highlights

- ★ Water-resistant
- ★ Lightweight
- ★ Time saving
- ★ Easily Installed
- ★ Ready to tile

Available Sizes:

- ★ 600mm x 1250mm x 30mm kit

30 x 600 x 1250mm

marmox Shower Niches

Creating Extra Spaces in Showers

If you are currently giving some thought to wet room design ideas, a shower niche is an elegant way to provide extra space for small shower items. The Marmox Shower Niche provides a low-cost, easily installed and completely waterproof option.

These shower niches are comprised of an extruded polystyrene core coated on either side with a thin but robust layer of fibreglass reinforced polymer cement.

Their ease of use, practical benefits and elegant appearance make Marmox Shower Niches the perfect addition to your shower.

Shower niches are very practical and easy to install when wet rooms are being built and work exceptionally well with Marmox Construction Boards wall sheeting.

Available Sizes:

(Internal Dimensions)

- ★ Small: 260mm x 300mm
- ★ Medium: 380mm x 300mm
- ★ Large: 550mm x 300mm
- ★ Extra Large: 700mm x 300mm

Highlights

- ★ Comes already constructed which guarantees the conformity and size
- ★ Lightweight and easy to work with
- ★ Ready to waterproof and then tile
- ★ Provides thermal insulation
- ★ Fit walls with cavities 86mm or deeper
- ★ Can be used to form a recess for toiletries within showers and other wet areas
- ★ Perfect for a DIY or professionally built bathroom

marmoxboard SoundBoard

Insulated Boards to Keep Things Quiet

Marmox SoundBoard is a tile backer board which reduces the impact noise that passes through a floor into the room below. Like Marmoxboard, it provides a completely water-resistant layer, secure decoupling, thermal insulation and low compressibility but with the added benefit of effective impact sound reduction.

One side of the board is coated with a sound attenuating layer of SBR rubber that isolates the tiled surface from the floor so that there is nothing for the sound waves to travel through. The rubber compound is natural so there is no plasticiser migration ensuring the material neither shrinks, degrades nor becomes brittle. SoundBoard will reduce the level of impact noise greater than the recommended minimum of 17dB.

Highlights

- ★ High thermal insulation
- ★ Reduces impact sound
- ★ Fully water-resistant
- ★ Use with under-tile heating
- ★ Ready to tile
- ★ Easy to cut
- ★ Marmox Lifetime Guarantee

marmox Shower Hob

Lightweight & Revolutionary Shower Finishing Product

Marmox Shower Hobs are ideal as a lightweight alternative to traditional shower hob materials such as concrete or bricks. Marmox shower hobs are made of the same revolutionary Marmox materials, involving an XPS foam core covered in a fibreglass polymer reinforced cement which makes them both water-resistant and extremely durable.

Marmox Hobs have a 50mm mitre on them at one end, which allows for the creation of right angles quickly and easily!

Available Sizes:

- ★ 65mm x 65mm x 1050mm
- ★ 65mm x 100mm x 1050mm

marmox Slicedstone Mosaic

Natural Stone Tiles on a Roll

SlicedStone mosaic sheets offer inspiring solutions for the design and renovation of bathrooms and wet rooms.

Marmox's new SlicedStone Mosaic range is sized using the latest technology in laser-processing machinery, allowing for accurately cut tiles. Backed with a decoupling waterproof membrane, the tiles are precisely spaced giving consistent 3mm grout lines that are pleasing even to the most critical eye.

The SlicedStone range comes in a choice of 10 beautiful finishes. Made from 4mm slices of Indian sedimentary rock, the surface has been treated with a clear Polycarbonate solution to create a stable surface that is waterproof, stain resistant, UV resistant and allows easy removal of adhesive and grout residue.

Marmox SlicedStone Mosaics are thin layers of real natural stone. Their natural surface, variety, vivid patterns and unique tactile texture all combine to make each sheet a feast to the eyes.

SlicedStone is an innovative new concept offering natural stone mosaics on a roll, with its own fully integrated 100% waterproof membrane, and inbuilt decoupling system.

The perfect design choice for bathrooms, showers and wet rooms in residential and commercial applications such as hotels, spa and wellness, plus sports and leisure projects.

Highlights

- ★ Stain resistant
- ★ UV Resistant
- ★ Reduced grout consumption
- ★ Secondary waterproofing protection

marmox Thermoblock

Load Bearing Thermal Insulation Blocks

Marmox Thermoblock is a block of load-bearing insulation material designed to be placed at the base of a masonry or timber-frame wall to address the thermal bridge. Its thermal conductivity is 0.05W/mK which results in a significant reduction of γ values when used at wall to floor junctions.

Marmox Thermoblock has a shear strength of 0.18N/mm^2 and a mean compressive strength of 9N/mm^2 , allowing it to be used under most load-bearing walls. Additionally, because Thermoblock is completely impermeable to water it may be used in damp conditions without any loss of insulation properties.

Thermoblock thermal insulation products not only reduce thermal bridging, but also create a moisture barrier.

A Comprehensive Range of Specialist Finishing Products

Marmox Waterproof Tape

A self-adhesive butyl rubber tape which will seal & waterproof joints between boards in wet areas.

Marmox Reinforcing Tape

A scrim tape to bridge all board junctions (except those in wet areas). Available in 20m or 90m rolls. For use when plastering.

Washers

Required when screw fixing. Screw hole diameter: 5mm (plastic) / 6mm (metal).

Mounting Brackets

A simple method of positioning boards, especially useful with pipe boxing board.

Fixing Dowels

A fast method of mechanically fixing the boards generally with the dot and dab method.

Waterproof Corner Pieces

A non-adhesive butyl based waterproof corner.

Quality Assurance

A commitment to the highest standards of quality assurance underpins everything we do.
